1. About AMP Capital Investors

AMP Capital Investors Limited (ABN 59 001 777 591, AFSL 232030) is the responsible entity and investment manager of the AMP Growth Fund. AMP Capital has been managing investments since 1849, making it one of Australia's oldest and most established investment managers.

AMP Capital is a wholly-owned subsidiary of AMP Limited (ASX: AMP), listed on the Australian Securities Exchange. The firm manages approximately AUD 58.2 billion in assets under management across diversified, fixed income, infrastructure, and real estate strategies.

ABN	59 001 777 591
AFSL	232030
Founded	1849
Headquarters	Sydney, NSW
Total AUM	AUD 58.2 billion
Ownership	Wholly-owned subsidiary of AMP Limited (ASX: AMP)

AMP Capital has maintained its AFSL continuously since the licensing regime was introduced. There have been no enforceable undertakings issued by ASIC against AMP Capital Investors Limited in respect of the AMP Growth Fund in the past five years. The firm's compliance framework is overseen by a dedicated Chief Compliance Officer reporting directly to the Board.

2. Investment Philosophy & Process

The AMP Growth Fund employs a dynamic asset allocation approach designed to deliver returns in excess of CPI + 4.5% per annum over rolling 5-year periods. The fund's investment philosophy is grounded in three core beliefs:

- Markets are not perfectly efficient, and disciplined active management can exploit mispricings across asset classes.
- Diversification across asset classes, geographies, and investment styles reduces portfolio risk without proportionally reducing expected returns.
- Dynamic asset allocation, informed by fundamental valuation and macroeconomic analysis, adds value over static benchmark weights.

The investment process has evolved since the fund's inception in 1998. Initially a balanced fund with fixed strategic weights, the approach shifted to dynamic asset allocation in 2008 following the GFC, recognising that valuation-driven tactical shifts could improve risk-adjusted outcomes. The current process, refined in 2019, incorporates quantitative signals alongside fundamental analysis.

Alpha Sources

The fund targets alpha from three primary sources: (1) strategic tilts between growth and defensive assets based on 12-month forward valuation models, (2) manager selection within each asset class using a proprietary scoring system, and (3) portfolio construction overlays including currency hedging and volatility management.

Process Evolution

The investment process underwent a significant evolution in 2019 with the introduction of machine-learning-based signals for tactical asset allocation. These signals complement, but do not replace, the fundamental views of the investment team. The integration was phased over 18 months with formal back-testing and governance approval at each stage.

3. Portfolio Construction

The AMP Growth Fund targets a growth-oriented asset allocation with the following strategic ranges:

Australian Equities	20-40% (SAA: 30%)
International Equities	20-40% (SAA: 30%)
Fixed Income	5-25% (SAA: 15%)
Real Assets	5-20% (SAA: 10%)
Alternatives	0-15% (SAA: 10%)
Cash	0-15% (SAA: 5%)

Concentration Limits

The fund applies the following concentration limits to manage risk:

- Maximum single security exposure: 5% of portfolio at cost
- Maximum single sector exposure: 30% of total equities allocation
- Maximum single manager allocation: 20% of total fund
- Maximum emerging markets exposure: 15% of total fund
- Maximum illiquid assets: 20% of total fund

Rebalancing is conducted monthly to within +/-3% of strategic asset allocation targets. A hard deviation limit of +/-10% from SAA triggers mandatory rebalancing within 5 business days regardless of the regular cycle.

4. Benchmark & Objectives

The fund's investment objective is to deliver total returns (income and capital growth) exceeding CPI + 4.5% per annum after fees over rolling 5-year periods.

Primary Benchmark CPI + 4.5% p.a.

Peer Benchmark Morningstar Multi-Sector Growth Category

Risk Objective Probability of negative return < 1 in 5 years

The CPI + 4.5% benchmark was selected as it represents a real return target appropriate for a growth-oriented investor with a 5+ year time horizon. This benchmark has been in use since fund inception in 1998 and has not been changed.

The benchmark is considered appropriate because: (1) it reflects the absolute-return objective of the fund rather than tying performance to volatile market indices, (2) it incorporates inflation protection for real purchasing power, and (3) the 4.5% real return premium is consistent with long-term equity risk premiums in Australian and global markets.

5. Key Personnel

The AMP Growth Fund is managed by the Multi-Asset Group within AMP Capital, led by:

Anna Shelley -- Chief Investment Officer

Anna Shelley has served as CIO of AMP Capital since 2020. She has over 25 years of investment experience, having previously served as Deputy CIO and Head of Investment Strategy. Anna holds a Master of Applied Finance from Macquarie University and is a CFA charterholder.

Investment Team

The Multi-Asset Group comprises 18 investment professionals with an average tenure of 8.2 years. The team includes:

- 4 senior portfolio managers (average experience: 18 years)
- 6 asset allocation analysts
- 4 manager research analysts
- 2 quantitative strategists
- 2 portfolio implementation specialists

Key person risk is mitigated through team-based decision making. No single individual has sole authority over asset allocation decisions. The Investment Committee (5 members) must approve all strategic and tactical shifts exceeding 3% of portfolio value.

Succession planning: The Deputy CIO is formally designated as acting CIO in the event of the CIO's absence. All portfolio managers have identified successors who participate in all investment decisions as part of ongoing development.

6. ESG Integration

AMP Capital is a signatory to the United Nations Principles for Responsible Investment (UNPRI) since 2007. The firm received an A+ rating for Strategy & Governance in its most recent UNPRI assessment.

ESG integration in the AMP Growth Fund is implemented through:

- Negative screening: Exclusion of controversial weapons manufacturers, tobacco producers (>10% revenue), and thermal coal miners (>30% revenue)
- ESG integration in manager selection: All underlying managers are assessed on ESG capabilities as part of the due diligence process
- Active ownership: AMP Capital exercises voting rights across all equity holdings and engages with companies on material ESG issues
- Climate risk: Portfolio carbon footprint is measured and disclosed annually; a Net Zero 2050 pathway has been adopted

The firm's Responsible Investment Policy is reviewed annually by the Board and is publicly available on the AMP Capital website.

7. Conflicts of Interest

AMP Capital maintains a comprehensive Conflicts of Interest Policy, approved by the Board and reviewed annually. Key provisions include:

- Related party transactions: All transactions with AMP Group entities are conducted at arm's length and require independent director approval. The fund may invest in AMP-managed sub-funds subject to fee rebate arrangements that eliminate double-charging.
- Personal trading: All investment staff must pre-clear personal securities trades through an automated compliance system. A 30-day minimum holding period applies. Trading in securities on the fund's active buy/sell list is prohibited.
- Soft dollar arrangements: AMP Capital does not accept soft dollar commissions. All brokerage is allocated solely on the basis of best execution for unitholders.
- Board independence: The Responsible Entity board has a majority of independent directors (4 of 6). The Chair is an independent non-executive director.

A register of conflicts is maintained by the Compliance team and reported to the Board quarterly.

8. Fees & Costs

The following fees apply to the AMP Growth Fund:

Management Fee (MER)	0.67% p.a. of NAV
Indirect Cost Ratio (ICR)	0.12% p.a.
Buy Spread	0.10%
Sell Spread	0.10%
Performance Fee	Nil
Entry/Exit Fees	Nil

The Management Fee is calculated daily on the net asset value of the fund and deducted monthly. The ICR represents estimated costs incurred by underlying managers and is deducted from the fund's assets.

The buy/sell spread compensates existing investors for transaction costs incurred when new investors enter or existing investors redeem. Spreads are reviewed quarterly and adjusted based on actual transaction costs.

Total estimated costs to investors (all-in): 0.79% p.a. plus applicable buy/sell spread on entry/exit.

9. Business Viability

AMP Capital Investors manages AUD 58.2 billion across all strategies as at 31 December 2025. The firm is a wholly-owned subsidiary of AMP Limited (ASX: AMP), a publicly listed financial services company.

Fund AUM	AUD 2,840 million
Fund Inception	1 July 1998
3-Year AUM Growth	+4.2% CAGR
Staff Turnover	12% (industry avg: 18%)

The AMP Growth Fund has operated continuously for over 27 years. Despite broader industry consolidation affecting AMP Limited, the fund management business has maintained stable AUM and team retention. The parent company's restructuring in 2022-23 resulted in a clearer focus on the investment management division.

There are no current indicators of wind-down risk. The fund's AUM of AUD 2.84 billion is well above the economic viability threshold, and the management fee revenue adequately supports the investment team.

10. Additional Disclosures

This section provides additional regulatory disclosures required under the Corporations Act 2001 and ASIC Regulatory Guide 97.

Taxation

The fund is an Australian resident trust for tax purposes. Distributions are made semi-annually (June and December). The fund has elected into the Attribution Managed Investment Trust (AMIT) regime, providing investors with clear tax reporting via an AMMA statement.

Withdrawal Rights

Investors may withdraw from the fund by submitting a withdrawal request on any business day. Withdrawals are typically processed within 5 business days. In extraordinary circumstances, the responsible entity may suspend withdrawals for up to 90 days under the fund's constitution.

Unit Pricing Policy

Unit prices are calculated daily based on the net asset value of the fund divided by units on issue. Valuations of underlying assets follow the valuation policy reviewed by the fund's auditor. Listed securities are valued at last traded price; unlisted assets are valued by independent valuers at least annually.

Complaints Resolution

Complaints can be directed to the AMP Capital Client Services team. If not resolved within 45 days, complaints may be escalated to the Australian Financial Complaints Authority (AFCA). AFCA membership number: 10523.

11. Risk Disclosures

All investments carry risk. The significant risks of investing in the AMP Growth Fund include:

- Market risk: The value of investments may fall due to adverse market conditions.
- Currency risk: International investments are subject to exchange rate fluctuations. The fund hedges approximately 50% of foreign currency exposure.
- Liquidity risk: Some assets (real estate, infrastructure) may be difficult to sell quickly at fair value.
- Manager risk: The risk that underlying managers underperform their benchmarks or fail to manage assets prudently.
- Regulatory risk: Changes to tax laws, superannuation rules, or financial regulations may adversely affect returns.

Risk Metrics (Target)

The fund targets the following risk parameters:

Expected Volatility	8-12% p.a.
Maximum Drawdown Target	-20% (peak to trough)
Tracking Error vs SAA	2-5% p.a.
Probability Negative Year	< 1 in 5 years

12. Governance Structure

The AMP Growth Fund's governance structure includes the following bodies:

- Board of the Responsible Entity (6 directors, 4 independent)
- Investment Committee (5 members, chaired by CIO)
- Risk & Compliance Committee (3 independent directors)
- Product Governance Committee

Investment Decision Framework

Strategic asset allocation decisions require Investment Committee approval by majority vote. Tactical shifts within approved ranges may be implemented by the lead portfolio manager. Any deviation beyond approved ranges requires emergency IC approval within 24 hours.

13. Regulatory Information

AMP Capital Investors Limited holds Australian Financial Services Licence number 232030, authorising it to operate registered managed investment schemes. The licence is current and in good standing as at the date of this PDS.

The fund is registered with ASIC as a managed investment scheme (ARSN 089 595 321). AMP Capital is a member of the Financial Services Council (FSC) and adheres to the FSC Standards.

Compliance Framework

AMP Capital maintains a compliance framework that includes: a dedicated compliance team of 12 professionals, automated trade surveillance systems, monthly compliance reporting to the Board, annual compliance plan approved by the Board, and regular staff training on regulatory obligations.

The firm maintains a breach register as required under its AFSL conditions. All breaches are reported to the Board's Risk & Compliance Committee and, where required, to ASIC. There have been no significant breaches relating to the AMP Growth Fund in the past three years.
